RE: Underground Storage Tank Facility #4-260115

Dear Mr. Ramsey:

This letter acknowledges that the EPA Form 7530-1 (Notification for Underground Storage Tanks) was received from you by the Environmental Protection Agency (EPA) on February 22, 1994 for your tanks located at 50 West Wapato Road, Wapato, Washington. Because your tanks are located on Indian land or within the boundaries of an Indian reservation, it is being regulated by the EPA rather than being included in the statewide notification program conducted by your state. A copy of your notification form will also be provided to your local Tribal UST Coordinator.

You have been assigned identification number 4-260115; this number should be included on all correspondence to us regarding any tank at this location.

Enclosed is an underground storage tank (UST) permit for your facility. The permit should be kept at the facility where your tanks are located, and available to show to distributors if necessary. Many distributors will look for your permits to be posted in your window.

Should an Environmental Protection Agency (EPA) inspector, an EPA authorized representative, or tribal UST coordinator visit your site, they may also ask to see the permit.

Please note that the permits are for a two year period and the expiration date is December 31, 1995.

Thank you for your cooperation in this program. If you have any questions concerning the permits or other requirements, please contact Katie Holt at (206) 553-2580.

Sincerely,

Katherine M. Holt, Data Manager
